This issue doesn't surprise me, one bit. It is these types of issues(worthless) that are presented to our Congress men and women, year in and year out, that waste their time and the TAXPAYER'S money. How about we throw the real issues on the plate. XM radio is the best invention since the Model T. And I support and will pay the monthly fee to continue to listen to what I feel is the smartest technology to be introduced in years. Thank you for all that you do XM!!
